

Lardizabalaceae

Akebia Decne.

Boquila Decne.

Decaisnea Hook.f. & Thomson.

Lardizabala Ruiz & Pav.

Sargentodoxa Rehder & E.H.Wilson

Sinofranchetia Hemsl.

Stauntonia DC.

VEGETATIVE KEY TO SPECIES CULTIVATED IN WESTERN EUROPE

Jan De Langhe

(31 August 2011 - 05 July 2021)

Vegetative identification key.

Introduction:

This key is based on vegetative characteristics, and therefore also of use when flowers and fruits are absent.

- Use a 10x hand lens to check pubescence and venation pattern in general.
- Look at the entire plant. Young specimens, shade, and strong shoots give an atypical view.
- Beware of hybridisation, especially with plants raised from seed other than wild origin.

Taxa treated in this key: → p4.

Taxa referred to synonymy in this key: → p4.

Remarks: → p4.

Acknowledgements:

I am particularly grateful to Benn Baudts, Charles Boulanger, Koen Camelbeke, Olivier Collin, Paul Goetghebeur, Tom Hudson, Rosalyn Marshall, Joke Ossaer, Jacky Pousse, Charles Shine, Kees en Lida van Gaal, and Bleddy Wynn Jones for extra help with constructive comments and specimens.

My explicit thanks for support goes to Arboretum Het Leen, Arboretum Wespelaar, Crûg Farm Plants, Ghent University Botanical Garden, Jardin Jungle, Royal Botanic Gardens Edinburgh, Royal Botanic Gardens Kew, Tregrehan Garden, Tuin de Geesthof and RHS Wisley.

Also thanks to the responsible persons of various arboreta, botanic gardens and collections where I could collect herbarium specimens since 1982.

Arboretum Wespelaar

01 a	Shrub. Leaf pinnately compound.	02	
b	Liana. Leaf ternate, binate or palmately compound.	03	
02 a	Leaflet LS minutely pubescent (10x LENS).	<i>Decaisnea fargesii</i>	
b	Leaflet LS glabrous.	<i>Decaisnea insignis</i>	
03 a	Plant variably pubescent with long hairs (10x LENS).	<i>Boquila trifoliolata</i>	
b	Plant glabrous.	04	
04 a	Leaf variably ternate (3 leaflets) and binate (2x3 lfts) and often trinervate (3x3 lfts).	<i>Lardizabala funaria</i>	
b	Leaf ternate, <u>OR</u> ternate to 5-9-palmately foliolate.	05	
05 a	Leaf ternate <u>AND</u> lateral petiolule absent or <5 mm.	06	
b	Leaf variably ternate to 5-9-palmately foliolate <u>AND</u> lateral petiolule 5-30(-more) mm.	07	
06 a	Lateral leaflet petiolate.	<i>Sinofranchetia chinensis</i>	
b	Lateral leaflet sessile.	<i>Sargentodoxa cuneata</i>	
07 a	Leaflet apex +/- emarginate, with apiculus completely recurved (10x LENS)	<i>Akebia</i> .	08
b	Leaflet apex predominantly acuminate to caudate	<i>Stauntonia</i> .	11
08 a	Leaf predominantly ternate <u>AND</u> leaflet (broadly) ovate.	<i>Akebia trifoliata</i>	
b	Leaf (3-)5(-7)-foliolate <u>AND/OR</u> leaflet elliptic to obovate or obovate oblong.	09	
09 a	Leaflet irregularly coarsely dentate to shallowly lobed.	<i>Akebia ×pentaphylla</i> (<i>A. quinata</i> × <i>A. trifoliata</i>)	
b	Leaflet margin entire.	10	
10 a	Leaflet obovate to elliptic obovate.	<i>Akebia quinata</i>	
b	Leaflet oblong to obovate oblong.	<i>Akebia longeracemosa</i>	
11 a	Leaf predominantly ternate.	12	
b	Leaf 3-5(-more)-foliolate.	15	
12 a	Terminal leaflet lanceolate to oblanceolate.	<i>Stauntonia</i> aff. <i>libera</i> CHB16-CH66	
b	Terminal leaflet ovate or ovate oblong.	13	
13 a	Leaflet LS tertiary veinlets slightly visible (10x LENS).	<i>Stauntonia coriacea</i>	
b	Leaflet LS quaternary <u>and!</u> quinary veinlets visible.	14	
14 a	Leaflet LS secondary venation rather prominent/elevated (10x LENS).	<i>Stauntonia latifolia</i>	
b	Leaflet LS secondary venation rather shallow.	<i>Stauntonia brachyandra</i>	
15 a	Terminal leaflet L/W ratio ≥3/1.	16	
b	Terminal leaflet L/W ratio <3/1.	17	

- 16 a Terminal leaflet L/W ratio 5/1(-more). ***Stauntonia linearifolia***
- b Terminal leaflet L/W ratio 3/1-4/1. ***Stauntonia angustifolia***
- 17 a Terminal leaflet oblong to ovate oblong AND apex acuminate to caudate. 18
- b Terminal leaflet ovate to elliptic AND apex (sub-)acute to acuminate. 19
- 18 a Lamina US secondary veins slightly impressed (10x LENS). ***Stauntonia latifolia***
- b Lamina US secondary veins and most tertiary veins rather strongly impressed.
..... ***Stauntonia chapaensis***
- 19 a Leaf thin, papery. ***Stauntonia* aff. *medogensis***
- b Leaf thick, leathery. 20
- 20 a Leaf (3-)5(-7)-foliolate. 21
- b Leaf 3-5-foliate. 22
- 21 a Mature leaf basal leaflet petiolules predominantly long. ***Stauntonia hexaphylla***
- b Mature leaf basal leaflet petiolules predominantly short. ***Stauntonia grandiflora***
- 22 a Leaflet ovate to elliptic. ***Stauntonia* aff. *chapaensis* BSWJ7250s**
- b Leaflet ovate to obovate oblong. ***Stauntonia purpurea***

Taxa treated in this key.

Akebia longeracemosa
Akebia ×pentaphylla (A.quinata x A.trifoliata)
Akebia quinata
Akebia trifoliata

Boquila trifoliolata

Decaisnea fargesii
Decaisnea insignis

Lardizabala funaria

Sargentodoxa cuneata

Sinofranchetia wilsonii

Stauntonia angustifolia ←*holboellia/Stauntonia fargesii*
Stauntonia brachyandra
Stauntonia chapaensis
Stauntonia aff. chapaensis
Stauntonia coriacea
Stauntonia grandiflora
Stauntonia hexaphylla
Stauntonia latifolia
Stauntonia aff. libera
Stauntonia linearifolia
Stauntonia aff. medogensis
Stauntonia purpurea

Taxa referred to synonymy in this key.

Lardizabala biternata → *Lardizabala funaria*
Holboellia → *Stauntonia*
Holboellia fargesii → *Stauntonia angustifolia*
Stauntonia fargesii → *Stauntonia angustifolia*

Remarks.

The identity status of following taxa is not clear to the author for the time being:

Stauntonia aff. *chapaensis* BSWJ7250S in cultivation, is a Sue and Bleddy Wynn Jones collection from Doi Cheng Dao in northern Thailand.

Stauntonia aff. *libera* CHB16-CH66 in cultivation, is a Charles Boulanger collection from China, with 3-foliolate (fide FOC 5-8-foliolate) leaves.

Stauntonia aff. *medogensis* CHB16-CH35 in cultivation, is a Charles Boulanger collection from China.
